

Preventive Pharmacy Services

The following is a list of preventive services that PHP has determined meet, and in some cases exceed, the requirements and recommendations issued by the Affordable Care Act (ACA).

The ACA requires that non-grandfathered health plans cover preventive care services with no cost sharing. A prescription is required for over-the-counter (OTC) products to be covered with no cost share. Prescriptions must be obtained at an in-network pharmacy. This list is subject to change.*

Adults

Prevention of cardiovascular disease and colorectal cancer aspirin 81 mg (OTC, generic) for adults age 50-59

Colorectal Cancer Screening Adults age 50-75 are covered for the following generic formulations of the prescription and OTC bowel prep products:
